- English: B2-C1 Level
- Critical thinking
- Communication

About Me

As a Front-End Developer with a talent for effective communication in both Georgian and English, I am driven by ambition to exceed set goals in my career. I am eager to enhance and strengthen essential skills to become a valuable asset. While my experience primarily lies in education, I have a strong desire to engage in real-life projects and gain practical knowledge. Consequently, I actively seek opportunities for self-improvement.

Education

sep 2020 - Present
Business And Technology University

Information Technologies

Dec 2022 - Aug 2023
IT Academy Step

Front-end Development

During the studying time, I have deepened my understanding of HTML, CSS, SCSS, jQuery, and gained fundamental knowledge of JavaScript with the ES6 standard. Additionally, I have acquired proficiency in utilizing Bootstrap to develop responsive and customized applications for web and mobile devices. I have practical experience working with GitHub and have initiated the process of creating meaningful projects.

Sep 2023 - Nov 2023
Digital Institute

JavaScript

As I explored more deeply into the JavaScript programming language, I focused on building uncomplicated projects utilizing objects, arrays, and functions. These projects encompass the development of various registration and authorization forms, burger menus, dropdowns, sliders, filtrations, and animations.

Dec 2023 - Present
Udemy

JavaScript/React

To this day, I continue to enroll in courses on self-learning platforms one after another, as I am committed to advancing my career and skill set without pause.
