Education

- ITVET Academy- cyberknowledge, basic algorithms
- BTU- (Business and Technology University)
- IT Academy Step- Front-end Development
- Digital Institute- Javascript
- Udemy – Sass, Javascript, React, node.js

Basic Experience

ITVET Academy   Jun 2019 - Oct 2020

After completing one-year course, I gained insights into basic algorithms in web development and worked with a group of experienced developers in a team - contributing in projects such as "Esida," which is currently in the process of being launched, and the development of "Stix" (School of Digital Art).

IT Academy Step   Dec 2022 - Aug 2023

Deepened my understanding of HTML, CSS, SCSS, jQuery and acquired a fundamental knowledge of JavaScript with the ES6 standard. Got to know the usage of Bootstrap to create responsive and customized applications for both web and mobile devices. Experienced working with GitHub and started paving the way towards creating meaningful projects.

Skills: HTML5 · CSS3 · JavaScript(basics) · GitHub

Communication · Team Leadership

Digital Institute   Sep 2023 - Nov 2023

Diving more into the JavaScript programming language, I have been engaged in building uncomplicated projects with objects, arrays, and functions. These projects include the development of various registration and authorization forms, burger menus, dropdowns, sliders, filtrations, and animations.

Skills: JavaScript · DOM · ES6

Udemy   Dec 2023 - Present

To this day, I take courses on self-learning platforms one after another, as I don't plan to stop developing my career.

Skills: Scss, React, node.js

Summary

   A person with a high sense of responsibility, well-organized when it comes to working on a project, a quick learner while still managing to pay attention to details and skillful in working with HTML, CSS/SASS and JavaScript to create efficient, scalable and user-friendly projects.
