Front-End Developer

Junior Front-End Developer with an experience in creative projects. Actively engaged in web page development and design. Has trouble-free communication in both Georgian and English languages.

My background involves creating responsive websites using JavaScript, CSS, and HTML. Successfully finished relevant courses to enhance skills and I'm Eager to further advance and strengthen my skills in this field.

Basic Experience

ITVET Academy

After completing the one-year course, I gained insights into both the designer's role and the development aspect. I worked within my team and collaborated with a group of developers, mastering the user's perspective and understanding human psychological and communicative instincts. Collaborating with the team, I participated in projects such as **"Esida,"** which is currently in the process of being launched, and contributed to the development of **"Stix"** (School of Digital Art).

IT Academy Step

Deepened my understanding of HTML, CSS, SCSS, jQuery and acquired a foundational knowledge of JavaScript with the ES6 standard. Mastered the usage of Bootstrap to create responsive and customized applications for both web and mobile devices. Gained experience in working with GitHub and successfully completed small projects utilizing mentioned technologies.

Skills:

HTML5 · CSS3 · GitHub

Communication · Deadline Oriented · Team Leadership

Digital Institute

Diving deeper into the JavaScript programming language, I have been engaged in creating uncomplicated projects utilizing objects, arrays, and functions. These projects include the development of various registration and authorization forms, burger menus, dropdowns, sliders, filtrations, and animations.

Skills:

JavaScript · DOM · ES6

Time Management · Problem Solving · Detail-oriented

Education

➢ ITVET Academy- Communication, User Experience, English, Markup, cyberknowledge
➢ BTU- (Business and Technology University)
➢ IT Academy Step- Front-end Development
➢ Digital Institute- Javascript Basics
➢ Udemy

Technical Skills

➢ HTML, CSS, jQuery
➢ Languages: JavaScript (Basics)
➢ Frameworks / Libraries: Bootstrap
➢ Others: GitHub / Visual Studio / Netlify / Firebase
➢ Sketch, Figma, Canva, Wix, Marvelapp
➢ English: B2-C1 Level
➢ Low-code platforms: retool

Up to this point, I have cultivated the skill of collaborating effectively within a team, demonstrating the capability to achieve desired outcomes promptly while managing time efficiently. I carefully consider each criterion throughout the work process, enhancing its overall quality and demonstrating a keen attentiveness to details. This attribute becomes particularly significant in the phase where the product is visually checked out by the user, and its usability undergoes exploration.
